

11/08/2023 Expt No:-

To create a VM - write application with your Name.

Procedure

* At first we should create VIO workstation app.

* Then open it shows options.

* Click "Home" button.

* Directly shows some options they are

* Create a New VIO work.

* It asks choose the virtual machine hardware compatibility choose it.

* It shows guest operating system
installation click NEXT.

* We have select type of OS.

⇒ Windows

⇒ Linux

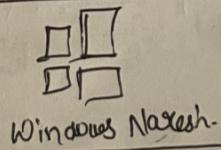

⇒ VIO work.

* On that screen there are many attributes like name, address, number etc.

- 15
- * According to your needs you can select and drag them into screen
 - * For restaurant system we can use name, address, date etc.
 - * After that we can able to use that restaurant complaint form.

Output:

Devices	
<input type="checkbox"/> Memory	6.1 GB
<input checked="" type="checkbox"/> Processor	4
<input type="checkbox"/> Hard disk (NVMe)	15 GB
<input type="checkbox"/> CD/DVD (SATA)	Using file C:\Kunal Windows
<input checked="" type="checkbox"/> Network Adapter	NAT
